

GAMUT MEETING

Features

Online Voting Board Member View

Author: eBOARDsolutions

// BOARD MEMBER VIEW //

Board members have an opportunity to cast their votes themselves when an admin opens online voting. A pop-up will display on their screen with the meeting agenda item, its contents, and voting options. Board members will be cast their votes and view the results if they are shared. Additionally, board members do not need to be viewing the meeting to cast their vote, they only need to be logged into their Simbli account. **How to Cast Online Vote** when an admin opens online voting, a pop-up will display on the screen with meeting agenda item contents made available.

- 1) When voting is opened, scroll through agenda content
- 2) After scrolling, select your vote
- 3) Click on Record My Vote when finished

// BOARD MEMBER VIEW //

4) Pop-up will display that the vote is recorded

The screenshot displays a voting interface. At the top, it says "Voting Open" and "4/4 Votes Recorded" with a close button. Below this is the proposal: "i. Consider Quotes to replace Baseball fence". Under "Details", there is a photo of a man in a red shirt and blue cap standing by a fence. A list of board members is shown: Mr. John Sherman, Mr. Oliver Dawe, Dr. Ryan Sharples, and Ms. Delores Hodge. Below the photo is a "Votes" section with a table:

	Yes	No	Abstain	Recuse
Delores Hodge	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

A green message bar at the bottom of the table says "✓ Your vote has been recorded." At the bottom right of the interface is a "Record My Vote" button.

Note: As board members cast their votes, board members will see how many of the votes have been received by looking in the top upper-right corner.
